

ELVIK S.A.

B15 Class Incombustible Materials

PANELS ■ DOORS ■ CEILINGS

efficient | fast | accurate

more than 30 years in the business

more than 340 satisfied customers

ELVIK S.A., established in 1982, is the pioneer in manufacturing incombustible materials (B-15 class) in Greece, such as panels, doors, ceilings etc. Above written materials can be used for interior spaces and arrangements in vessels, according to SOLAS and all its latest amendments as well as in buildings (land construction projects). The design of our materials is our own patent for which we also have certificates from well-known International Organizations (Lloyd's Register, Danish Fire Institute, Lydteknisk Institut etc.).

So far we have constructed / converted more than 340 vessels, owned by Greek and Foreign Shipping Companies, from all over the world. In addition, we can take care of the interior decoration and furniture/equipment supply and installation.

Apart from supplying all requested B-15 Class materials, we can also provide installation works and supervision as well as further technical consulting and relevant services.

We are in this business for thirty years now and we have been satisfactory cooperating with all of our customers.

Our company can undertake all interior facilities arrangements, regarding vessels. Please, note that for our line work and quality system, we have been awarded numerous times.

ELVIK S.A. has developed a non-combustible materials system, which has been approved via International Certificates, according to the S.O.L.A.S. and latest requirements.

The ELVIK system PANELS (SANDWICH type) are made of galvanized steel plates and mineral wool, which can faultlessly fit together, forming the most qualified protection against fire. They can also provide high standard noise insulation and especially the STANDARD PANEL of 50mm is able of a noise reduction up to 45 dB.

Additionally, special panels (i.e. "L", "T" shapes etc.) can be manufactured, according to customer needs and instructions. ELVIK factory features a fully automated production line.

Our materials on board

Cruise Vessels

- Delphin Voyager
- Aegean Odyssey
- Arion
- Ocean Countess
- Louis Cristal
- The Calypso

Passenger Ferries

- Nissos Rodos
- European Voyager
- Lefka Ori
- Bari
- Theofilos
- Adamantios Korais
- Ionian Spirit
- Princess T

Yacht Vessels

- Varity Voyager
- Galileo
- Ishamm Al Baher
- Blue Desire
- O' Mega
- Corvus

Ferry Boats

- Protoporos V & VI
- Dimitrios S
- Maria - Eleni
- Aris III
- Filotheos
- Aeolos II
